SIGNATURE FACIALS | ADVANCED TREATMENTS

MARINA VIEW | SIGNATURE FACIAL

all skin types

A revolutionary facial treatment that will have you rethinking the average facial. State of the art, completely customized for your skin, combining the latest technology and most advanced skincare products. It hydrates the skin while improving the tone, texture and pores. Your treatment includes: skin analysis, deep cleansing, steam treatment, mechanical and enzymatic exfoliation, extractions, cryotherapy, microcurrent, LED light therapy, and oxygen infusion.

MARINA VIEW | ADVANCED ANTI-AGING FACIAL

sun damaged/aging skin types

Combination of chemical, enzymatic and mechanical exfoliation to improve fine lines and wrinkles, skin discoloration, tone, and texture. The skin is hydrated as well. Your facial may include deep cleansing, steam treatment, exfoliation, extractions, individualized masque and cryotherapy.

MARINA VIEW | CLARIFYING FACIAL

acne/acne prone/oily skin types

Treats acne and acne prone skin, minimizes pores and blackheads, and controls/balances oil production. This treatment includes deep pore cleansing for those with blemished or troubled skin, exfoliation, extractions, cryotherapy and LED blue light therapy to destroy acne-causing bacteria on skin.

MARINA VIEW | ORGANIC SENSITIVE SKIN FACIAL

sensitive/rosacea/post treatment skin types

Gentle exfoliation using organically based products to restore health, vitality, and balance to your complexion in this completely customized facial. Perfect for dry, sensitive, environmentally-stressed, and compromised skin to soothe, calm and hydrate. Your facial may include deep cleansing, steam treatment, exfoliation, extractions and an individualized treatment masque.

MARINA VIEW | GENTLEMAN'S FACIAL

all skin types

For our male patients we have designed a facial that meets the specific needs and challenges of a man's skin. This facial takes into consideration your skin type and then provides a customized treatment that can help repair environmental damage and skin sensitivities caused by daily shaving. These treatments are for men who like to look, live and feel their best.

MARINA VIEW | TEEN FACIAL

adolentcent skin types

Facials for teens designed to address breakouts that are associated with adolescent skin. Created for the teen's complexion, these facials help treat persistent skin troubles and prevent problems before they start. An added bonus—these facials teach teens the importance of a skincare regimen and preemptive skincare.

SILK PEEL DERMAL INFUSION

Silk Peel Dermalinfusion combines non-invasive exfoliation with deep skin delivery of patient-specific solutions without the use of crystals or other chemical exfoliants. Silk Peel's wet exfoliation leaves your skin silky-smooth, hydrated, bright, and full of the youthful glow that we all desire.

INTRACEUTICALS OXYGEN INFUSION

This treatment utilizes the latest hyperbaric oxygen technology to achieve dramatic reduction in the appearance of dry or irritated skin. It may also be used simply to improve circulation and make sallow skin glow. Oxygen therapy facilitates the delivery of liquid antioxidants and other active ingredients to the deeper layers of the skin, and it also protects the epidermis from sun damage, pollution, and stress. Perfect before an event for that red-carpet glow!

DERMAPLANING

Dermaplaning is a simple and safe procedure for exfoliating the epidermis and ridding the skin of fine vellus hair (peach fuzz). Removing epidermal skin also allows products to penetrate more readily into the deeper layers. This treatment may be recommended to prepare the skin for medical procedures such as laser treatments or chemical peels. This is a great alternative for patients who are pregnant or nursing that want a deep exfoliation, but are advised not to use peeling agents on their skin.

VITALIZE PEEL

mild to moderate skin imperfections

Vitalize Peel is used decrease the appearance of fine line wrinkles, restore an even skin tone and diminish scarring which may occur with acne. The Vitalize Peel treatment utilizes a formulation of peeling agents which includes: alpha-hydroxy acid, beta-hydroxy acid, resorcinol and retinoic acid. The exfoliation and restructuring of the collagen tissue effectively reduces pore size, smoothes ruddy complexions and improves the texture of skin, resulting in a healthier and more resilient complexion.

REJUVENIZE PEEL

moderate to severe skin imperfections

Rejuvenize Peel is an advanced formulation of peeling agents, with a built-in anti-irritant and penetration enhancer that provides controlled exfoliation of the uppermost damaged layers of the skin to reveal fresher and healthier skin. Effective for use on skin with sun damage, melasma, pigmentary changes and acne scarring.

PIGMENT CORRECTION PEEL | MINI PEEL

hyperpigmentation/melasma

The Pigment Correction Peel and Mini Peel are superficial peels designed to treat pigment, especially melasma. The system consists of two parts: a masque applied by our medical staff and an after care medical-grade regimen provided at your appointment. The Pigment Correction Peel and Mini Peel skin lightening system will improve the texture and appearance of hyperpigmented skin and melasma. The Mini Peel is a less intensive version of the Pigment Correction Peel, yet still offers pigment reduction benefits.

MICRO NEEDLING THERAPY

acne scars/sun-damage/aging skin types

The RejuvaPen causes controlled micro-injuries to the skin, resulting in a healing cascade that creates new collagen and elastin. Micro needling allows for an increased absorption of products, your skin becomes firmer, and it regains its elasticity. Fine lines and wrinkles are visibly reduced, pores become finer, circulation is stimulated and the overall condition of the skin improves.

INJECTABLES | FILLERS

BOTOX®

BOTOX® Cosmetic is a prescription medicine that is injected into facial muscles and used to improve the appearance of moderate-to-severe lines and wrinkles. BOTOX® is safe and effective with results lasting 3-4 months.

DYSPORT®

Dysport® is a prescription medicine that is injected into muscles and used to improve the appearance of moderate-to-severe lines and wrinkles. Dysport® is safe and effective with results lasting 3-4 months.

BELOTERO®

Belotero® is a Hyaluronic Acid dermal filler used as a temporary treatment for superficial lines and moderate to severe facial wrinkles and folds such as nasolabial folds or “parentheses lines.”

JUVÉDERM™ XC

JUVÉDERM™ XC is a Hyaluronic Acid dermal filler used for the improvement of moderate to severe facial wrinkles and to add volume to the skin. This may give the appearance of a smoother surface.

JUVÉDERM VOLUMA™ XC

JUVÉDERM VOLUMA™ XC injectable gel is the first and only Hyaluronic Acid dermal filler FDA-approved to instantly add volume to the cheek area. It gives you a subtle lift, helping restore contour and a more youthful profile for up to 2 years.

RESTYLANE-L®

Restylane-L® can be used to add volume and fullness to the skin to correct moderate to severe facial wrinkles and folds, such as the lines from your nose to the corners of your mouth (nasolabial folds). Restylane-L® may also be used for lip enhancement.

RADIESSE®

RADIESSE® Volumizing Filler adds the volume and lift needed to diminish the signs of aging. What makes RADIESSE® truly unique is the ability of the product to act as a scaffold under the skin, providing structure and stimulating collagen to grow. The production of natural collagen continues for several months beyond the initial effect of RADIESSE® Volumizing Filler. Best of all, the natural results are clinically proven to last a year or more in many patients.

SCLEROTHERAPY

Sclerotherapy is one method, along with laser ablation, for treatment of spider veins. Injecting the unwanted veins with a sclerosing solution causes the target vein to shrink and then dissolve over a period of weeks as the body absorbs the treated vein. Sclerotherapy is a safe and effective treatment for spider veins.

VITAMIN B-12 INJECTION

Vitamin B-12 injections are administered to help boost one's energy, attitude and health.

LASERS

PHOTOFACIAL (IPL) - LIMELIGHT

Limelight IPL is perfect for the patient with both red and brown discoloration. It also treats discrete vessels. Limelight IPL combines benefits of three distinct light based devices. This range of wavelengths allows for both hemoglobin and melanin absorption to achieve optimum performance.

LASER FACIAL - LASER GENESIS

Laser Genesis is FDA cleared for treatment of wrinkles but also helps reduce pore size and improve texture of the skin. Through gentle heating of the dermis, fine structures such as the microvasculature are targeted and collagen formed. It is safe to treat all skin types, even during the summer.

LASER VEIN - COOLGLIDE EXCEL

Coolglide Excel treats spider veins (telangiectasia). Coolglide delivers pulses of light energy that cause blood within the vein to coagulate, destroying the vessel. Most patients find that one treatment is sufficient. For optimal results, however, multiple treatments may be necessary.

LASER HAIR REMOVAL - COOLGLIDE

The Coolglide laser is unique because it has a copper cooling tip that cools the skin before and after each laser pulse. This protects the skin from a possible burn, making it safe for all skin types. Most areas require 6 -8 treatments.

FRACTIONAL CO2 LASER

Fractional CO2 laser can be used to improve texture (such as acne scarring), wrinkles, and blotchiness on the face, chest, neck, and arms. The CO2 laser energy creates very thin and spaced columns of thermal damage, which penetrate into the dermal skin layer and stimulate new collagen production. The tissue between the columns of thermal damage is spared, resulting in a faster healing process. Downtime is typically 5-7 days. Our new laser allows a range of treatments, from deep to superficial, depending on patient desires.
